3. The following is an examiner's statement of reasons for allowance:

Claims 1, 3- 5, 7 – 9, 11 – 13, 15 and 16 recite, inter alia, a method of forming a semiconductor device comprising the steps of implanting Group III monoatomic dopant having molecular weight greater than B into the p well and then implementing a rapid thermal annealing process to activate the dopant after the ion implantation layer is formed and before the screen oxide film is etched or removed. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.
